Vehicle Summary

Mechanical: Shock absorbers have a leak front left and back right. Brake pads and rotors are rusted and need to be replaced. Stabilizer bushing front and back right are worn out, need to be replaced. ABS brake sensor wiring is disconnected in the engine bay. There is an oil leak between the engine and transmission. There are a set of wires that are disconnected in the undercarriage. The oil level was fine, but needs to be replaced due to being overused. Exhaust is upgraded.

Exterior: Please refer to the paint condition report. In addition, the rear hook cover is missing, as well as the rear logo is worn out and the door locks are aftermarket so the doors don't close easily.

Interior: The odometer has been rolled back. You can see proof in the interior photos. The driver side door has really bad wiring done. None of the buttons work, as well as the side step sensors are not working. The locks are aftermarket.
